SISO friends

SISO FRIENDS CO., LTD.

About SISO

SISO FRIENDS is a seafood manufacturing and export company based in Tongyeong, Korea's leading seafood production hub. Combining our own manufacturing capabilities with close partnerships across a wide network of local manufacturers and processors, we have built a stable production and supply chain that spans a broad product range — from nori-based items such as sushi nori, seasoned seaweed, roasted seaweed, and seasoned seaweed flakes, to frozen seafood including eel, mussel, oyster, blood cockle, and clam.

Beyond simply supplying finished products, we directly support OEM and private-label manufacturing, custom product development, and package design and customization, delivering solutions tailored to each buyer's target market and requirements. Thanks to our own manufacturing capabilities together with our extensive network in Tongyeong and long-standing relationships built on trust, we can respond flexibly to everything from small test orders to full-scale mass production.

We currently export primarily to the Russian market, steadily building experience and operational capability in overseas distribution. By systematically managing every stage of the process — from manufacturing quality control to export procedures and client communication — SISO FRIENDS continues to establish itself as a reliable partner for international buyers.

Seafood

A seafood lineup processed from fresh raw materials sourced off the coast of Tongyeong, including frozen oyster, eel, mussel, clam, and blood cockle.

Using the IQF (Individually Quick Frozen) method, we preserve the natural freshness and texture of each ingredient, with systematic quality control at every stage of hygienic processing.

Available in a wide range of formats — from 500g retail packs to 10kg bulk packaging — allowing flexible supply tailored to distribution, retail, and food service needs.

Seaweed

NORI-Sushi Nori

Centered on sushi nori made with traditional Korean seaweed processing techniques for kimbap, our lineup also includes temaki (hand roll) sheets and onigiri nori, each tailored to a specific use.
With variations in size, sheet count, and seasoning, the range can be matched to sushi restaurants, kim-bap franchises, and convenience-store ready meals alike.
We also offer premium, flavor-enhanced options such as seasoned seaweed and truffle seaweed to meet a wide range of consumer preferences.

Seaweed

NORI-Gamtae

Made from gamtae (green laver) harvested in the clean tidal flats of Garorim Bay, Seosan, Chungcheongnam-do, this line ranges from raw and roasted gamtae to bite-sized mini formats.

Each sheet is processed to preserve gamtae's characteristic soft texture, delicate aroma, and rich umami, making it equally suitable as a side dish ingredient or a light, crispy snack.

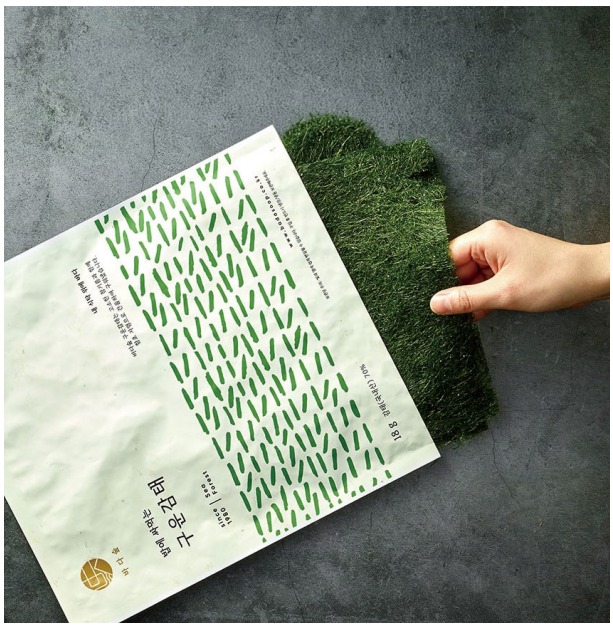

Available in sizes from 1g mini packs to bulk formats, the lineup can serve both small-format retail channels and large-volume distribution.

Seaweed

NORI-Fillings & Salad

Ready-to-use seaweed products for culinary applications, including kimbap fillings and pre-seasoned wakame salad. Requiring no additional trimming or preparation, these items help food service businesses and side-dish producers save on prep time and labor while improving kitchen efficiency. The wakame salad is available in standard 500g and 1kg units, with custom packaging sizes also available to meet each buyer's specific requirements.
